MEMORANDUM

1400 K Street, N.W., Suite 900; Washington D.C. 20005; (202) 682-4800, Fax (202) 682-4854; www.rma.org

To: Manufacturers of Molded & Extruded Products
From: Daniel Mustico, Vice President
Date: October 22, 2008
Re: Vendors' Identification Guide for Molded & Extruded Products: 2009 Edition

Attached for your information is the 2009 RMA Vendors' Identification Guide for Molded & Extruded Products. This catalog is a revision of the 1989 edition.

These codes are intended to serve only as a method of identifying the product(s) of a given manufacturer. They are the property of the manufacturer to which they have been assigned and should not be used by others for the purpose of product identification.

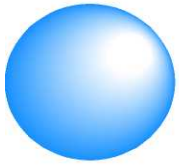

Additional background and guidelines on use of these codes is contained in the preface.

While the listings shown herein are based on the best information available to the RMA, no claims are made as to the completeness or currency of the information shown.

Assignment of new codes are a service of membership, but non-member manufacturers can purchase a code license for a fee of \$500. For information contact Theresa Johnson at (202) 682-4827 or tjohnson@rma.org.

Thank you.

PREFACE

VENDORS' IDENTIFICATION GUIDE FOR MOLDED AND EXTRUDED PRODUCTS

1. Background:

Prepared as a service to the industry and its customers, this publication catalogs codes and symbols that have been assigned to identify the manufacturers of various molded and extruded rubber and plastic products required by the automotive industry, the government and other segments of the economy. The system of codes and symbols was originated by the U.S. automotive industry and later expanded by the Technical Committee on Automotive Rubber, jointly sponsored by the Society of Automotive Engineers (SAE) and the American Society for Testing and Materials (ASTM).

One, two or three letter codes are used to identify the manufacturers of molded products made of rubber or plastics. Symbols comprised of pyramids, spaces and plateaus are used to identify the manufactures of extruded products. In this publication a pyramid is characterized by the letter A. A plateau is characterized by the letter O.

In 1949, at the request of SAE and ASTM, RMA accepted responsibility for the assignment of these molded and extruded products codes. Over the years their use has become a requirement of standards in both the public and private sectors, including Department of Defense military standard MIL-STD 190C Identification Marking of Rubber Products, and SAE standards J1601, J1603, J1604 and J1605 on brake cups, seals, boots and gaskets.

2. Role of RMA and Guidelines for use of these Codes:

These codes are intended to serve only as a method of identifying the product (s) of a given manufacturer. They are the property of the manufacturers to which they have been assigned and should not be used by others for the purpose of product identification.

The Association serves as the agency for the assignment of codes to producers of these products; maintains a record of the codes assigned to manufacturers and periodically publishes the guide to show those codes placed into use and the companies to which the codes have been assigned.

RMA's assignment of a code to a manufacturer does not imply endorsement or approval of the company or its products or that the product meets any particular standard or specification. A manufacturer need not be a member of the RMA to obtain a code.

While the listings shown herein are based on the best information available to the RMA, no claims are made as to the completeness or currency of the information shown.

This edition of the RMA "Vendors' Identification Guide for Molded and Extruded Products" catalogs the list of all codes and symbols initially assigned by the auto manufacturers, those assigned by the SAE/ASTM Committee and those which have been issued by the RMA. This printing supersedes all previously published editions of the Guide issued by RMA.

The RMA should be notified of any change affecting a code assignment, such as a change of company name or address.

Inquiries concerning the contents of this publication should be directed to Theresa Johnson, Rubber Manufacturers Association, 1400 K Street, N.W., Washington, D.C. 20005, (202) 682-4827.

**LIST OF MANUFACTURERS CODE LETTER IDENTIFICATION
FOR MOLDED PRODUCTS**

| MOLDED CODE | COMPANY NAME |
|-----------------|--|
| A | W.B. Jarvis Company (Now Doehler-Jarvis Corp.-DJ) |
| B | Detroit Steel Products Company |
| C | Eaton Axle & Spring Company |
| D* | Chrysler Dodge Plant (Code Discontinued) |
| D | Detroit Aluminum & Brass Company (For Bearings Only) |
| E | Aluminum Company of America |
| F | Aluminium Industries Inc. |
| G | Bohn Aluminum & Brass Company |
| H* | Chrysler Engineering Laboratories |
| I | Motometer Company |
| J* | Chrysler Jefferson Avenue Plant |
| K | Arvin Industries, Inc. |
| L* | Chrysler Lynch Road Plant (Code Discontinued) |
| M | Aluminum Goods Mfg. Company |
| N* | Chrysler New Castle Plant |
| O | Chase Brass & Copper Company |
| P* | Chrysler Plymouth Plant (Code Discontinued) |
| Q | Scoville Mfg. Company |
| R | Eaton Detroit Metal Company |
| S | D.L. Auld Company |
| T ⁶⁹ | Clevite Bearings Div. of JP Industries |
| U | Johnson Bronze Company |
| V | Standard Steel Spring Company |
| W ⁵² | Houdaille Hershey - Detroit Bumper Division |
| X* | Laher Auto Spring Company |
| Y | Sterling Products Company |
| Z | Pressed Metals Company of America |

**LIST OF MANUFACTURERS CODE LETTER IDENTIFICATION
FOR MOLDED PRODUCTS**

| MOLDED CODE | COMPANY NAME |
|--------------------|--|
| AA* ⁴² | Rabestos-Manhattan - Passaic Division |
| AB | Fedders Mfg. Company - (Allied-Baltic Rubber, Inc. notified the Association that it is using a stylized (connected) version of the letters AB to identify its products). |
| AC ¹⁰ | Blackstone Corp. - Automotive Division ¹⁰ |
| AD | Perfex Corporation |
| AE | McCord Radiator & Mfg. Company |
| AF | Long Mfg. Company |
| AG | Wagner Electric Company |
| AH* ⁶⁰ | Weatherhead Division of Dana Corporation |
| AI* ⁸⁸ | Miller Rubber Company |
| AJ | Modine Mfg. Company |
| AK | Burgess Battery Company |
| AL | Wilcox Rich Corporation |
| AM | (Not Assigned) |
| AN | U.S. Spring & Bumper Company |
| AO ⁹¹ | Fel-Pro, Inc. |
| AP* | Federal-Mogul Corporation |
| AQ | Gordon Mfg. Company |
| AR | McKay Company |
| AS | American Injector Company |
| AT* ³⁹ | Gates Molded Products Company |
| AU* | The Goodyear Tire & Rubber Company |
| AV* ¹¹³ | General Motors Corp. - Delco Products Division (Chasis) |

| 116 | CR | Formerly assigned to Bloomfield Hills Company |
| 117 | AGS | Formerly assigned to Pirelli Sistemi Antivibranti, S.P.A. |

DESCRIPTION OF CODES FOR EXTRUDED PRODUCTS

Vendors' identification codes for extruded products that have been assigned to various manufacturers are shown on the attached lists. The desired location of this identification may be indicated on the drawing of the part. When incorporated on a part, the spacing, or joining together, of the pyramids, plateaus and spaces shall be in accordance with the established code. The width and height of these pyramids and plateaus shall depend upon the size of the part. It is recommended that they be kept to a minimum, consistent with a clear identification marking. The normal width of the base of the plateau shall be 1/16 of an inch (1.5 mm). The proportion of the plateau width to the pyramid width or to the space width shall be approximately three to one.

In determining the manufacturer of a part from the identification, it must be remembered that the direction of the identification may be in reverse order. The list is set up, however, on the basis that no identification codes are duplicated, regardless of the direction of reading. Codes that may be in reverse order are marked with a double asterisk (**).

KEY TO EXTRUDED PRODUCT CODES:

- A = PYRAMID (▲)
- O = PLATEAU (▒)
- = SPACE

LIST OF MANUFACTURERS CODE LETTER IDENTIFICATION FOR EXTRUDED PRODUCTS

| PYRAMIDS | |

N.B.**

A double asterisk on the preceding pages indicates actual listing of the code may be in reverse order. (In determining the manufacturer of a part from the identification, it may be that the direction of the symbol is in reverse order. However, no code symbols are duplicated, regardless of the direction of reading.)
